

CIRCULAR
(Girls Section)

Dear Parents

It is observed that too much confusion and traffic congestion is created in and around the girls school area. The officials from the traffic department have already intimated the school to take necessary actions to control this. The local citizens are also complaining about the difficulties created because of unorganized way of traffic management. Parents and private transport operators are advised to follow the instructions regarding the use of different gates:

Gate No. 1 exclusively for school buses.

Gate No. 2 & 3 (main gate) for parents to drop the children

Gate No. 5 for long route buses and parents to drop.

Gate No. 6 & 7 for private vans, coasters etc.

The dispersal of the Girls School is 10 minutes earlier than the boys section. Thus all the private vehicles have to take the girls first. It is noted that the van drivers are asking the girls to come and wait outside in junctions away from the school where there is no safety and protection for them. It is attracting the outsiders to gather and to tease the girls. So drivers have to take care that they are picking the girls from the school gate itself and the girls should not be allowed to go out of the school campus after the school hours. We are encouraging separate transportation for girls and boys. Parents are also advised to ensure that senior girls are travelling in vehicles meant for them. All students, parents and private drivers are requested to cooperate with this measures and to strictly comply with the instructions issued to you.

Regards

Dr E K MOHAMMED SHAFFE
Principal & HOI
