Penguins

Penguins are among the most popular of all birds .They only live in and around the South Pole and the continent of Antarctica. No wild penguins live in the North Pole. There are different kinds of penguins. The largest penguin is called the Emperor Penguin and the smallest kind of penguin is the little Blue Penguin. There are 17 different kinds of penguin in all and none of them can fly. Penguins survive in some of the Earth's coldest and windiest conditions. They are great swimmers and have thick layer of fat to protect from the bitter cold. Even in their freezing cold habitats, penguins still have to watch out for predators such as killer whales and seals.

Answer the following questions:

1. In which continent penguins can be seen?

2. How many different types of penguins are there? Can they fly?

3. What is the largest kind of penguin called?

4. What do penguins have in their body to protect themselves from bitter cold?

5. What do penguins have to watch out for?
