Q. Reading Comprehension

Read the passage carefully and answer the questions below :

(5)

Hummingbirds fly in a unique way. They move their wings so fast that they can hover. This means that they can stay in one spot in the middle of the air, like a helicopter. Sometimes they fly or hover upside down. They are the only bird that flies backward.

Hummingbirds are small. One type called the bee hummingbird is the smallest bird in the world. Bee hummingbirds weigh less than a penny. They are just a little bit bigger than bees. I guess that's where they get their name.

Bee hummingbirds build tiny nests. They use cobwebs and bits of bark to make their homes. Their homes are only an inch around. This is big enough for their eggs though. Their eggs are smaller than peas. People have found these tiny nests on a clothespin.

Their favorite food is nectar, a sweet liquid inside of some flowers. They drink more than their own weight in nectar daily. They have to visit hundreds of flowers to get enough nectar to live.

Q1. Which is the smallest bird in the world?

Q2. What do bee hummingbirds use to make their nests?

Q3. How small are the bee hummingbird's eggs?

Q4. What is the hummingbird's favourite food?

Q5. Pick out any two adjectives from the given paragraph.

a) _____

b) _____
