II. Match the following:

(4*1/2 = 2 mks)

- | | |
|---------------------------|--------------|
| 1. Highest temperature | Semi circles |
| 2. Height above sea level | Equator |
| 3. Meridians | Altitude |
| 4. 0° latitude | Rajasthan |

III. State True or False :

(4*1/2 = 2 mks)

1. Meridian of 180°E and 180°W is the same line.
2. Places near the sea coast have an extreme climate.
3. Temperate zone is also called as Tropical zone.
4. All parallels are of same length.

IV. Give answers in one or two words :

(4*1= 4 mks)

1. The longest parallel - _____.
2. The zone that experiences hot and humid climate - _____.
3. Angle at which meridians cut parallels - _____.
4. Zone lying between Antarctic Circle and South Pole - _____.

V. Define :

(2*1 =2 mks)

1. Pole -

_____.

2. Climate -

_____.

VI. Give reason :

(1 mk)

1. Chennai is nearer to the equator than Delhi. But Chennai is not so hotter than Delhi during summer season. Why?

_____.

PART – B (To be done in answer sheet)

VII. Answer in brief :

(3*1 ½ = 4 ½ mks)

1. List any three factors that affect the climate of a place.
2. Write a short note on the Prime Meridian?
3. How do seasons affect our lifestyle?

VIII. Answer in detail : (Any one)

(1*3 = 3 mks)

A. Write any three differences between latitudes and longitudes.

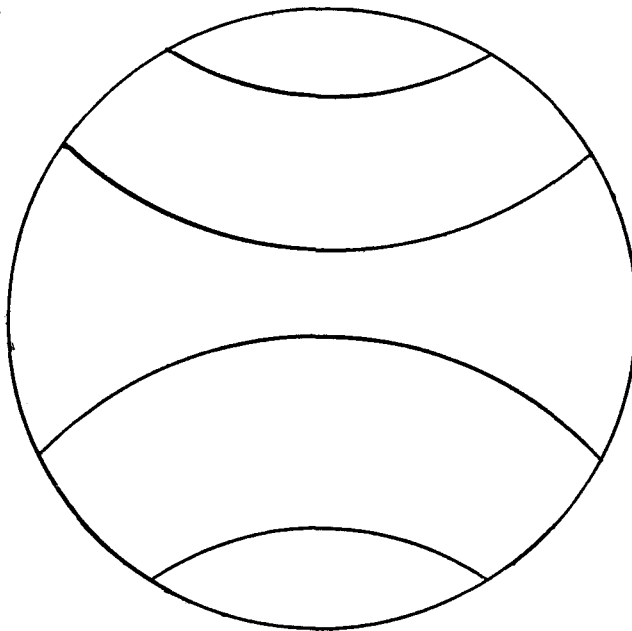

(OR)

B. Describe about the climatic conditions found in the three heat zones of the earth.

PART – C (To be done in question paper)

IX. Label the three heat zones.

(1 ½ mks)

X. Draw and label the five important parallels.

(2 ½ mks)
