\_\_\_\_\_

**IV. Name the following:**

1. Things which do not have life. \_\_\_\_\_
2. A plant which close its leaves when touched. \_\_\_\_\_
3. All living things need this to breathe. \_\_\_\_\_

**V. Define the following.**

1. Reproduce :

---

---

2. Living things :

---

---

**VI. Read and Answer.**

Natural things are those that are found in nature and are not made by humans. They exist independently of human activity and are often part of the earth's ecosystems. Examples of natural things include trees, rivers, mountains, animals, and the air we breathe. Living organisms like plants and animals are considered natural because they grow, reproduce, and interact with their environment without any human intervention. Non-living things like rocks and oceans are natural since they occur on their own in nature. Natural things play a vital role in maintaining the balance of the environment. For example, trees provide oxygen, animals contribute to diversity of life, and natural bodies of water support various life forms.

1. All are natural things except \_\_\_\_\_
  - a. Trees
  - b. chair
  - c. rivers
  - d. mountains
2. Which of the following is a natural living thing?
  - a. sun
  - b. rocks
  - c. plants
  - d. oceans
