Reading Comprehension

The Future of Artificial Intelligence

Read the passage below and answer the questions that follow.

Artificial Intelligence (AI) has rapidly evolved over the last few decades, becoming an essential part of many industries. From healthcare and finance to transportation and entertainment, AI technologies are transforming the way we live and work. These systems are designed to analyze data, learn from experience, and make decisions without constant human intervention.

One exciting area of AI development is machine learning, where computers improve their performance by processing vast amounts of information. This has led to advancements such as self-driving cars, speech recognition, and automated customer service. Machine learning allows AI to adapt to new situations and solve complex problems, making it more versatile than ever before.

Despite these advancements, AI also presents significant challenges. For instance, concerns about privacy have increased as AI systems collect and analyze personal data. There are also worries about job displacement, as some roles may become automated. Furthermore, ensuring that AI systems are fair and unbiased remains an ongoing struggle, as flawed data can lead to unfair outcomes.

Looking ahead, many experts believe that AI will continue to grow in capability and influence. They emphasize the importance of developing ethical guidelines and regulations to manage AI's impact on society. By balancing innovation with responsibility, AI has the potential to improve many aspects of life while minimizing risks.

Questions:

1. In which industries is AI transforming the way we live and work?
2. What do AI systems primarily do?
 - A) Replace human thinking completely
 - B) Analyze data, learn from experience, and make decisions
 - C) Control human actions directly
 - D) Work only when manually operated
3. What is one exciting area of AI development mentioned in the passage?
 - A) Cybersecurity B) Machine learning C) Robotics manufacturing D) Social media
4. Which of the following is a result of machine learning?
 - A) Self-driving cars B) Automated customer service C) Speech recognition D) All of the above
5. What concern is raised about AI systems?
 - A) They may increase physical labor B) They may cause job displacement and privacy issues
 - C) They may slow down industries D) They may stop technological growth
6. Why is fairness in AI outcomes difficult to ensure?
 - A) Computers cannot store enough data B) AI is too expensive
 - C) Flawed data can lead to unfair results D) People do not want AI
7. What do experts emphasize for the future of AI?
8. What balance is necessary for AI's growth?
9. According to the passage, what is AI's potential?
10. Which of the following words is the best synonym for versatile?
 - A) Limited B) Inflexible C) Rigid D) Adaptable
